Education

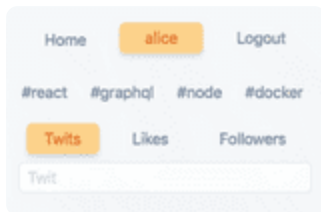

Last year Bachelor of Informatics student at Kaunas University of Technology.

Languages / Technologies

Main Typescript Javascript React Node.js GraphQL HTML CSS

Familiar with SQL Kotlin Go Java C# Bash Docker C Haskell

Projects

Twitit

A twitter-like web-app web app built using React, Node, PostgreSQL, and GraphQL, and deployed using Docker and Google Cloud Compute.

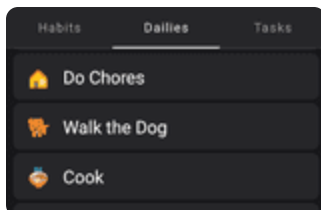

Daystich

A time tracking web app based on a hierarchy of activities and tags. Written in TypeScript using React and Redux.

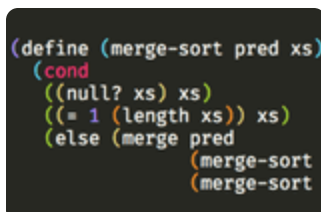

TailwindCSS Padded Radius

A TailwindCSS plugin that adds variants for creating matching nested border radii.

Endeavor

A gamified todo / habit tracker app for Android written in Kotlin using Jetpack Compose with a GraphQL server written in Typescript.

Lusp

An interpreter for a Scheme-like language written in Haskell. Features dynamic scoping, macros, scheme's numerical tower, and a REPL.
